

**KEY WORDS INDEX OF THIS ISSUE**

<b>Key words</b>	<b>Page No.</b>	<b>Key words</b>	<b>Page No.</b>
Age .....	466	Knowledge .....	470
Agriculture .....	470	Little millet .....	513
Agronomic traits .....	476	Microbial endophytes .....	420
Better parent .....	436	Mid parent .....	436
Biofortification .....	443	Mordants .....	500
Biological control .....	420	Motivation .....	482
Carbohydrate .....	509	Mulberry silk .....	500
Colour strength .....	500	Mulching .....	449
Community leaders .....	482	Nutrient uptake .....	449
Composite bread .....	513	Nutritional .....	482
Constraint .....	466	Opinion .....	482
Correlation coefficient .....	476	Optimization .....	513
Cotton .....	461,479	Path analysis .....	476
Cotton yield .....	456	Phytochemicals .....	509
Cropping system .....	449	Plain weave .....	495
Diamond weave .....	495	Pubescence .....	479
Economics .....	449	Quality parameters .....	509
Education .....	482	Rice .....	443
Elongation .....	500	Satisfaction .....	490
Empowerment .....	470	Seed cotton yield .....	439
Extension .....	466	Sensory quality .....	513
Family size .....	466	Standard heterosis .....	436
Ferrous sulphate .....	443	Straw .....	443
Flower bud midge .....	461	Sub surface drip .....	456
Fodder .....	466	Sunflower .....	476
Foundation course .....	490	Surface drip .....	456
Genetic diversity .....	439	Toweling fabrics .....	495
Grain yield .....	449	Training .....	470, 490
Heritability .....	439	Trichome .....	479
Heterosis .....	436	Usefulness .....	490
Honey comb .....	495	Variance .....	439
Huck-a-back .....	495	Vegetable soybean .....	509
Insecticides .....	461	Yarn strength .....	500
Insect-pests .....	420	Zinc sulphate .....	443
Jassid .....	479
